Thanks. I saw the table a few minutes ago. I'll have Erica LeDoux combine the ARPM and ARPE info into one table.

I drafted this one for Sterigenics/EtO & put it on the SharePoint site. I'll check with the section.

New Mexico Project	EPA Status Update
Sterigenics – Santa Teresa, NM	<p>New Mexico Ethylene Oxide update</p> <ul style="list-style-type: none">• Sterigenics- Santa Teresa was issued a PSD permit in 2014 by NM to add a new sterilization chamber.• Chamber control technology permitted to be greater than or equal to 99% efficient. As a result, the ethylene oxide emissions from this facility decreased 83%.• EPA is looking at air toxics emissions standards for other industries that emit ethylene oxide to determine whether a review of those rules is needed. EPA will start this closer look with its air toxics emissions standards for <u>commercial sterilizers</u>. EPA plans to publish its proposed rule in late summer.• To our knowledge the only other Sterigenics commercial sterilizer facility in R6 is in Grand Prairie, TX. <p>For Information on EPA Ethylene oxide efforts: https://www.epa.gov/hazardous-air-pollutants-ethylene-oxide</p> <p>For Information on Willowbrook, IL Sterigenics facility: https://www.epa.gov/il/sterigenics-willowbrook-facility</p>

Is Air Monitoring & Grants doing any WE CARE's or tabular updates for this meeting next Monday with NMED. If so, please send them to me for review either today or tomorrow by noon. Thanks.
